EXPERIENCE

Independent Developer   April 2023 – Present
Gorby - Text Analyzer and Editor
- Developed an ad-free, privacy-focused text analysis tool for writers, marketers, and students (gorby.app)
- Implemented features including text statistics, integration with LLMs, readability metrics, and more.
- Utilized React, TailwindCSS, Jotai, and Vite for frontend, with Pocketbase and Node.js for backend services
- Designed a clean and efficient UI/UX, optimizing for user productivity and ease of use
- Created landing page using Astro and TailwindCSS to effectively communicate product features

Customer Support Specialist & Frontend Developer   November 2019 – Present
Amazing Marvin   *Remote*
- Provide product support via email and community channels, managing user accounts and resolving issues
- Develop and maintain help center documentation, improving user onboarding and reducing support inquiries
- Conduct quality assurance and testing, documenting and verifying over 1000 user-reported bugs
- Implement frontend features and bug fixes using React, improving product functionality
- Write and execute end-to-end tests using Playwright

PROJECTS

Bućkaroš - Digital Fishing Log | *Laravel, React, Inertia.js, PostgreSQL*   March 2025 – Present
- Developing a digital fishing logbook for Serbian-speaking anglers (buckaros.com)
- Built full-stack application with Laravel backend and React frontend using Inertia.js for SPA experience
- Deployed full-stack application on VPS with automated CI/CD pipeline using GitHub Actions for seamless deployment
- Implemented weather API integration and water level data from Serbian RHMZ for environmental context
- Features include catch tracking, equipment management, location mapping, and fishing analytics

Support Toolbox | *React, Electron, TailwindCSS, Node.js, SQLite*   In Development
- Developing a desktop application to streamline customer support workflows and enhance productivity
- Implementing features for link management, discount tracking, response templates, and custom user lists
- Utilizing Electron for cross-platform compatibility and offline capabilities

Amazing Marvin Browser Extension | *React, TailwindCSS, Browser APIs*   2023
- Developed a browser extension to enhance productivity for Amazing Marvin users with over 800 active users
- Implemented features such as quick task addition, daily task list viewing, and Gmail integration
- Available at: Chrome Web Store

EDUCATION

University of Novi Sad   Novi Sad, Serbia
Bachelor's with Honours in Geodesy and Geomatics   *2014 – 2019*
